

## Powdered Fondant

### Ingredients:

|                           | kg    |
|---------------------------|-------|
| Flemings Powdered Fondant | 5.000 |
| Water                     | 0.650 |

### Method:

- Place water into mixing bowl and slowly add Powdered Fondant, mix together on slow and scrape down until all powder is dissolved.
- Heat to around 45-47°C and use straight away.
- This will give a high glossy finish to the products, if a softer icing is required additional water could be added.
